

CHALLENGE 16

Clean the Vinegar Way

Make your own all-purpose cleaner and help your family out this weekend with cleaning duties! It's easier than it sounds.

In a spray bottle, put one-part white vinegar and one-part warm water. Vinegar is an acid so it can cut through dirt, grime and grease! Give the bottle a good shake and grab a cloth cleaning rag. Spray down the kitchen table, kitchen counters, even your bathroom counter and follow up with the rag for a squeaky-clean surface! (Make sure not to get any in your eyes.)

For more difficult surfaces like the hob or bathroom sink, sprinkle some bicarbonate of soda (also known as baking soda), then spray it with your vinegar cleaner and watch it fizz and bubble up. Then wipe the surface down.
