**Ken Saro-Wiwa**  
LIVED: 1941-1993 BORN IN OGBURN, NIGERIA ROLE: WRITER AND ACTIVIST

Ken Saro-Wiwa was a well-known writer of novels, children's books and television shows before he became an activist. He was born in the village of Ogburn, a region of Nigeria where Royal Dutch Shell drilled for oil between 1956 and 1993. Shell extracted oil worth over US\$50 billion but polluted the land in the process. Huge oil spills rendered farmland, which fish and local wildlife were almost wiped out. Over 300,000 farmers and fishermen were victims of this devastation.

To fight back, Ken co-founded the Movement for the Survival of the Niger Delta (MOSOP). In 1998, MOSOP started protesting to demand a share of Shell's Nigerian profits and compensation for the damage it had caused. Ken was arrested and sentenced to death. He was later pardoned by the Nigerian government. Ken was arrested in connection with the murder of four Nigerian soldiers. Meanwhile, the Nigerian army launched a crackdown in Ogburn, murdering, raping and burning homes.

In 1993, a military court found Ken guilty of murder. Commentators around the world condemned the verdict. Shell was asked to withdraw its operations, but the company did nothing. Ken and eight other activists were hanged. Although Shell has since withdrawn the platform it owned in Ogburn, it was paid for human rights violations in 2009. Shell paid US\$200 million to the families of the men executed by the government. In 2018, the Nigerian government announced it would give US\$2 billion to clean up Ogburn.

**Be Inspired!**  
The spirit of Ken Saro-Wiwa is right everywhere from across the world. Ken is a reminder to look, think and act. Ken's actions inspire us to be brave and to stand up for what is right. Ken's actions inspire us to be brave and to stand up for what is right. Ken's actions inspire us to be brave and to stand up for what is right.

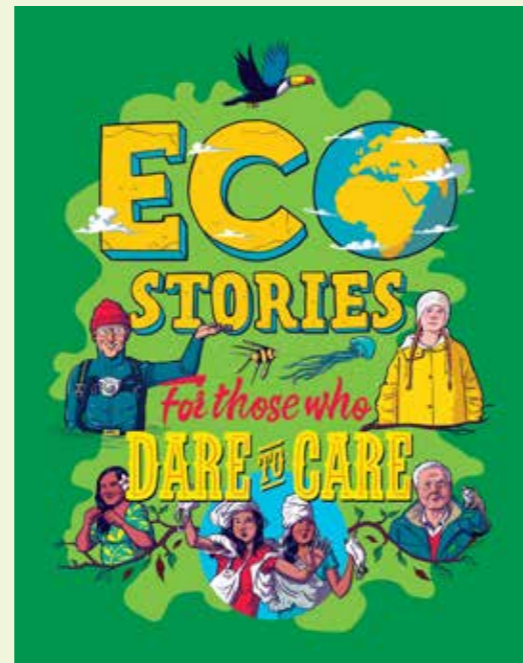

**Rachel Carson**  
LIVED: 1907-1962 BORN IN PENNSYLVANIA, USA ROLE: SCIENTIST, CONSERVATIONIST AND WRITER

Rachel Carson was a small, skinny girl who loved nature and reading books. By the age of ten, she was writing for children's magazines and as a teenager decided to study zoology at university. This was because Rachel's passion and she worked as a marine biologist while writing her first book, *Under the Sea*. She wrote several best-selling books about the sea, which won many awards and made her famous. But Rachel's environmental work would not end with books about the sea.

In 1955, Rachel moved to Maryland, USA, where she became involved in the spraying of pesticides by the government. Charged to kill the ants and other insects damaging to crops, she noticed how they were harming the natural environment. Rachel's next and most famous book *Silent Spring* argued against the use of pesticides. It contained several scientific studies which showed pesticide use led to the destruction of ecosystems and diseases, such as cancer, in humans.

Pesticide sprays were extremely toxic to birds. Rachel's book was very popular and led to the banning of many pesticides in the USA. It also led to a ban of some pesticides and the formation of the US Environmental Protection Agency. Rachel died in 1962 before the full results of her work became clear but her books continue to inspire people today. She was awarded the Presidential Medal of Freedom by President Jimmy Carter in 1982.

**Be Inspired!**  
Rachel Carson was always in the fight for the environment. She was a scientist, a writer, a conservationist and a pioneer. She was always in the fight for the environment. She was a scientist, a writer, a conservationist and a pioneer. She was always in the fight for the environment. She was a scientist, a writer, a conservationist and a pioneer.

The perfect introduction to environmentalism, with visually stunning portraits of the brave men and women that have fought for our planet's future. From Greta Thunberg to David Attenborough, Rachel Carson to Wangari Maathai, activists of all ages from all corners of the planet will inspire readers to think and take action.

**GREENHOUSE EARTH**

How can some gases in the air make the world warmer? It happens because of the greenhouse effect. A few types of gas, known as greenhouse gases, cause the greenhouse effect by trapping heat from the Sun close to the Earth.

**WHAT IS GREENHOUSING?**  
To make the greenhouse effect happen, plants like grass need to produce a type of gas called carbon dioxide (CO<sub>2</sub>). The air around the Earth is made up of many different types of gas. Most of the air is made up of nitrogen and oxygen. But there is a tiny amount of CO<sub>2</sub> in the air. This is the greenhouse gas that makes the greenhouse effect happen.

**HOW MUCH CO<sub>2</sub> IS THERE?**  
76% OXYGEN (O<sub>2</sub>)  
16% NITROGEN  
2% CARBON DIOXIDE (CO<sub>2</sub>)  
2% OTHER GASES

**DO GAS GIGGLES THEM FIND, THEY HAVE AND THEY GET BETTER OFF. THEY HAVE AND THEY GET BETTER OFF. THEY HAVE AND THEY GET BETTER OFF.**

Rights sold: Arabic, Chinese (simplified and complex), Dutch, Indonesian, Turkish, US, Vietnamese

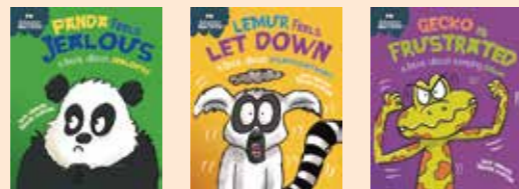

At Fun Jungle, Mr Croc got out his big stopwatch. He said he was going to time everyone to see who was the fastest to get round. He said the record for the fastest time was 15 minutes.

Cheetah **boasted** that he would win and that he would beat the record **easily**. Hippo was cross. He said it was better to **try hard** and to be a **good sport** than to worry about winning all the time.

At playtime it was raining. Everyone had to stay inside and play board games. Croc loved board games. But she got **too impatient** to wait her turn.

When it was Monkey's turn, Croc grabbed the dice instead. Worse still, she knocked over the board by accident. Everyone was cross with Croc for **spoiling the game**.

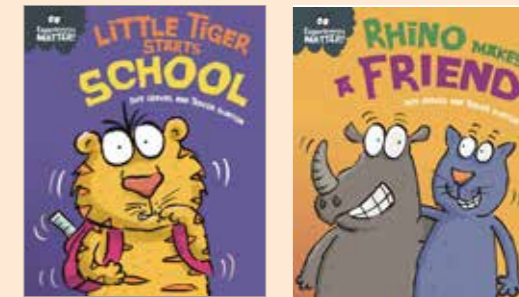

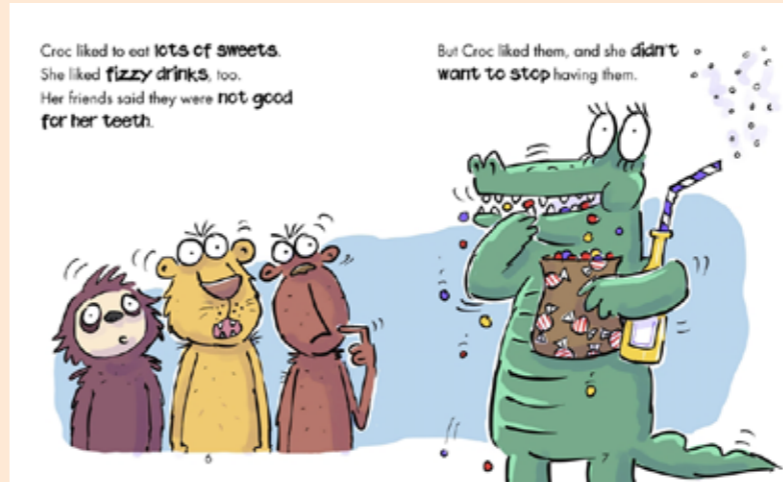

# Experiences Matter

# Fun Science

This science experiments series makes learning fun, by applying core science theory to high interest areas and hobbies.

Fun Science Experiments with Music	April 2022
Fun Science Experiments with Plants	April 2022
Fun Science Experiments with Art	February 2022
Fun Science Experiments with Cookery	February 2022

Claudia Martin	Approx 4,000 words	32pp	Age 7-9
----------------	--------------------	------	---------

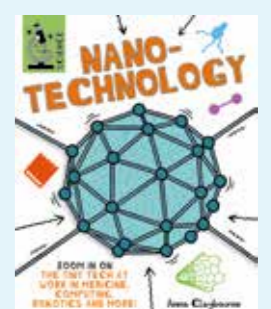

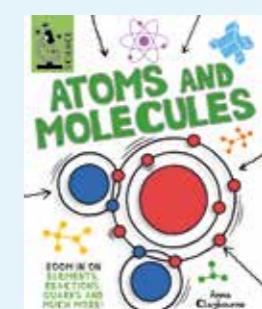

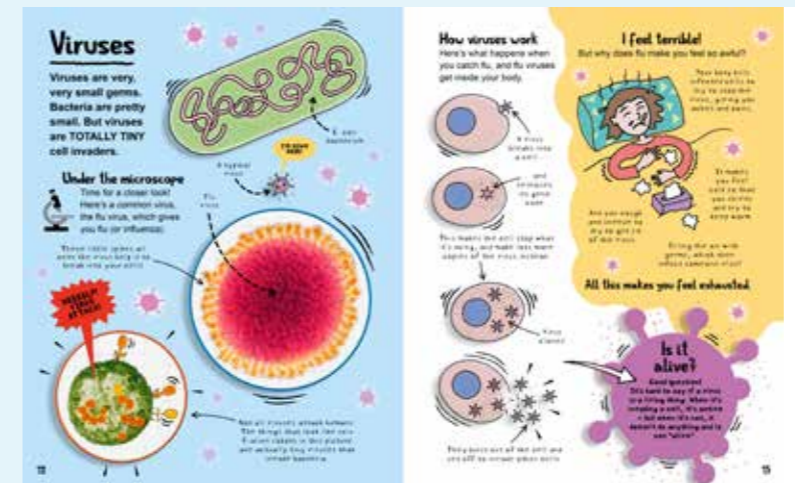

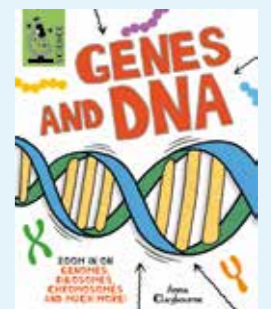

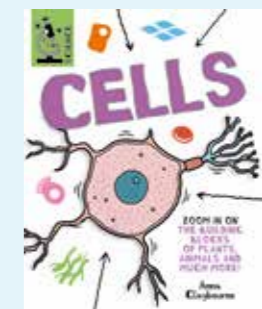

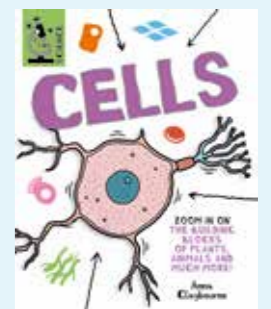

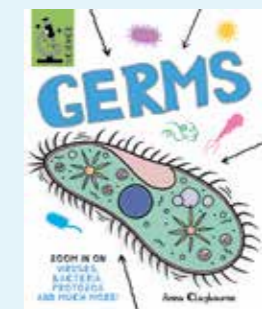

# Tiny Science

Tiny Science examines the science of things we cannot see with the naked eye, making the 'invisible' easily understandable for children learning about the building blocks of our world.

Tiny Science: Atoms and Molecules	June 2022
Tiny Science: Nanotechnology	June 2022
Tiny Science: Genes and DNA	April 2022
Tiny Science: Microscopic Creatures	April 2022
Tiny Science: Cells	February 2022
Tiny Science: Germs	February 2022

Anna Claybourne/Matt Lilly	Approx 4,500 words	32pp	Age 9-11
----------------------------	--------------------	------	----------

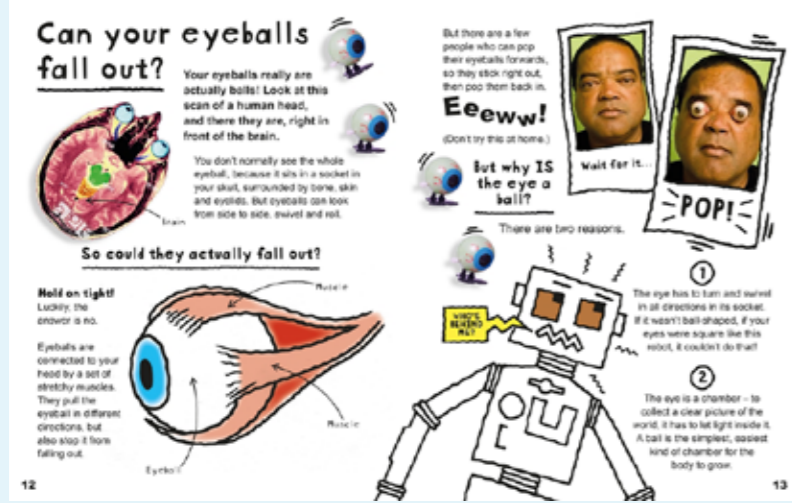

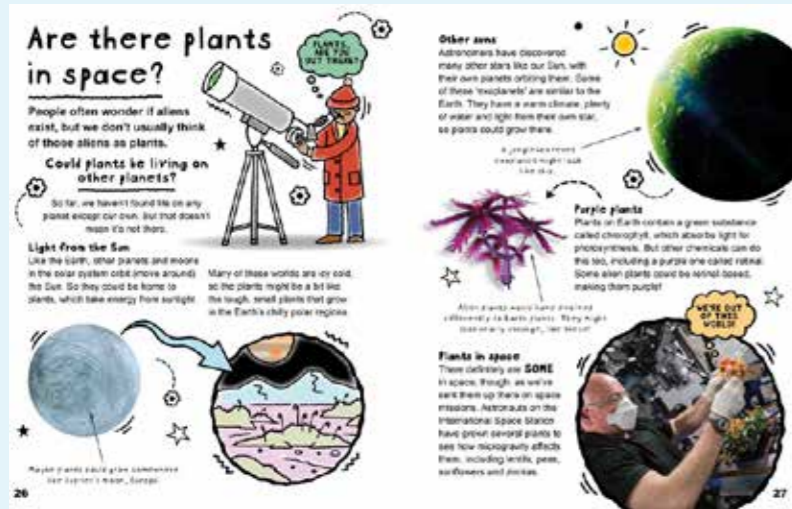

# A Question of Science

A science series that answers the funny, sometimes icky questions that kids really ask!

A Question of Science: Animals	Published
A Question of Science: Electricity	Published
A Question of Science: Forces	Published
A Question of Science: Light	Published
A Question of Science: Materials	Published
A Question of Science: Plants	Published
A Question of Science: Sound	Published
A Question of Science: The Human Body	Published

Anna Claybourne/Matt Lilly  
265x210mm Approx 5,000 words 32pp Age 9–11

Rights sold: Chinese, Japanese, US

See companion series *A Question of History*

# Quick Fix Science

Snappy the Nile crocodile introduces key science topics with a quirky bit of fun.

Quick Fix Science: Forces and Magnets	November 2021
Quick Fix Science: Materials	November 2021
Quick Fix Science: Light	September 2021
Quick Fix Science: Plants	September 2021
Quick Fix Science: Animals	July 2021
Quick Fix Science: Human Body	July 2021

Paul Mason 265x210mm Approx 2,000 words 32pp Age 5–7

# Animal Babies

A look at baby animals in a range of habitats, exploring how their parents look after them and how they learn, grow and thrive.

Animal Babies: In the Ocean	August 2021
Animal Babies: In the Rainforest	August 2021
Animal Babies: In the Snow	July 2021
Animal Babies: On the Farm	July 2021

Sarah Ridley 250x250mm Approx 1,200 words 32pp Age 5–7

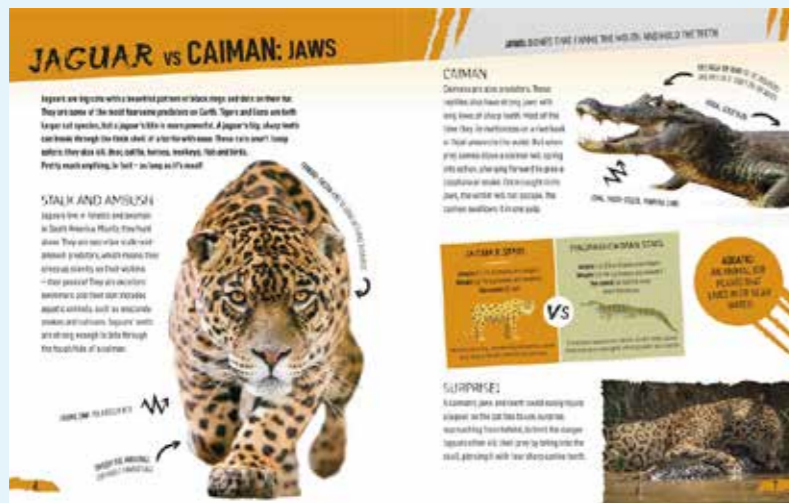

# Predator vs Prey

This series uses dramatic photographs to explore how predators are adapted to hunt and attack.

- How Sharks and other Fish Attack June 2021
- How Snakes and other Reptiles Attack May 2021
- How Spiders and other Invertebrates Attack May 2021
- How Eagles and other Birds Attack April 2021
- How Lions and other Mammals Attack April 2021

Tim Harris 265x210mm Approx 3,500 words 32pp Age 9-11

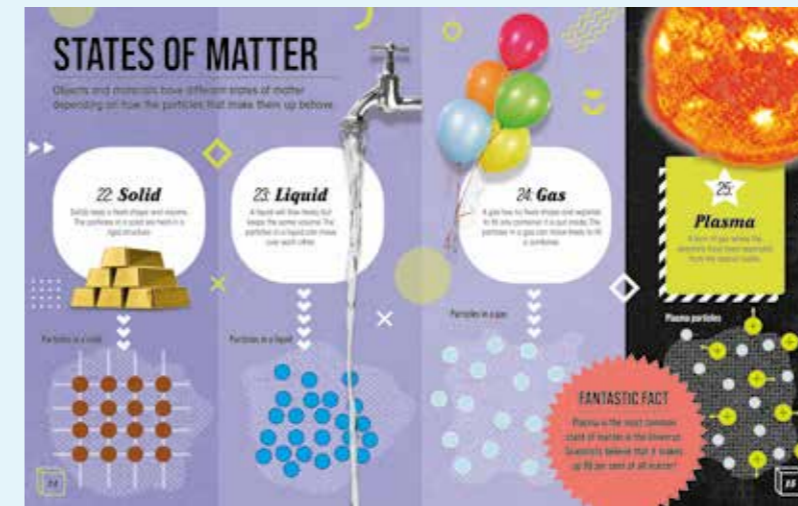

# Wise Words

This series brings together definitions and explanations of essential STEAM vocabulary, with tips and tricks on how to remember them.

- Wise Words: 100 Maths Words Explained November 2021
- Wise Words: 100 Art Words Explained October 2021
- Wise Words: 100 Engineering Words Explained October 2021
- Wise Words: 100 Science Words Explained September 2021
- Wise Words: 100 Technology Words Explained September 2021

Jon Richards 244x172mm Approx 3,500 words 48pp Age 9-11

# Stupendous and Tremendous Science

Children can explore core science topics in this entertaining series full of facts, fun photos and illustrations.

- Ecstatic (and Excellent) Energy March 2022
- Powerful (and Pongy) Plants March 2022
- Happy (and Healthy) Human Body January 2022
- Soaring (and Spectacular) Space January 2022

Claudia Martin 240x240mm Approx 4,000 words 32pp Age 9-11

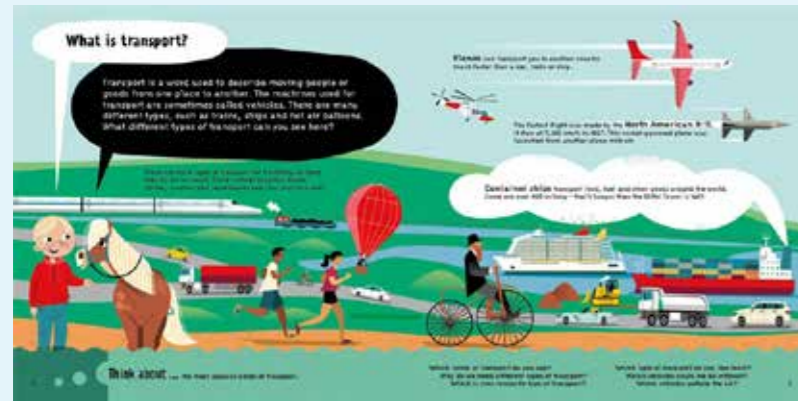

# So Many Questions

Ideal for inquisitive children, each book in this series is filled with questions (and answers) to build knowledge around key topics.

So Many Questions: About Oceans	March 2022
So Many Questions: About Rainforests	March 2022
So Many Questions: About Animals	January 2022
So Many Questions: About Plants	January 2022
So Many Questions: About Space	November 2021
So Many Questions: About Buildings	November 2021
So Many Questions: About Robots	September 2021
So Many Questions: About Transport	September 2021

Sally Spray/Mark Ruffle	Approx 2,000 words	32pp	Age 7-9
-------------------------	--------------------	------	---------

# Cats React

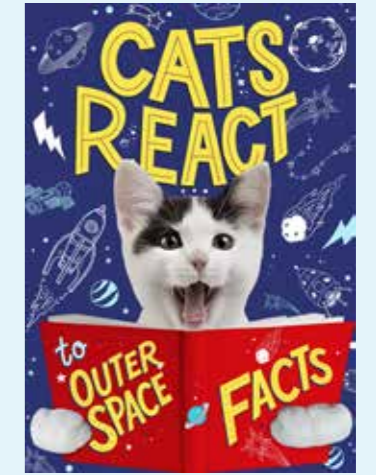

With a crew of crazy cats and measure your amazement, awe and disgust alongside their furry feline faces!

Cats React to Outer Space Facts	Published
Cats React to Science Facts	Published

Izzi Howell	Approx 8,000 words	112pp	Age 7-9
-------------	--------------------	-------	---------

Rights sold: Dutch, Finnish, Japanese, US

# Monster Science

This myth-busting series explores the science behind the hottest monsters in pop culture.

The Science Behind Mermaids, Werewolves and Bigfoot	August 2021
The Science Behind Unicorns, Dragons and Kraken	August 2021
The Science Behind Vampires, Witches and Ghosts	July 2021
The Science Behind Zombies, Mummies and Frankenstein's Monster	July 2021

Joy Lin/Violet Tobacco	Approx 7,000 words	32pp	Age 9-11
------------------------	--------------------	------	----------

# The Poo-niverse

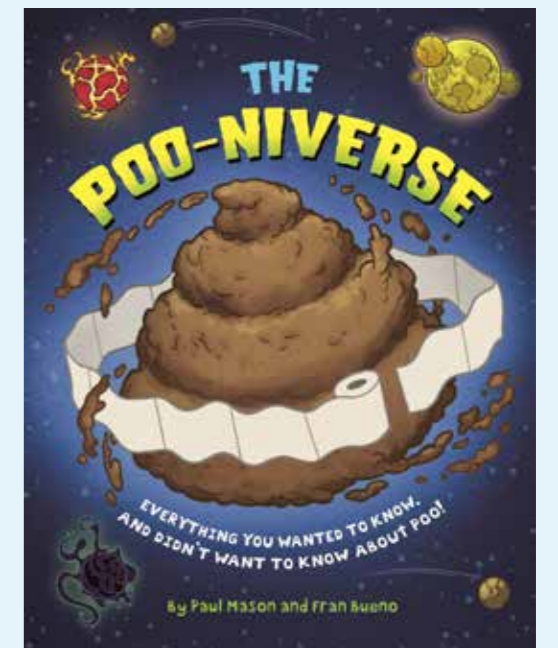

The Poo-niverse is your a one-stop for excrement information, from poo-eating worm toilets to poisonous poos, from poo particles on toothbrushes to crucial post-poo hand-hygiene tips.

The Poo-niverse	September 2021
-----------------	----------------

Paul Mason/Fran Bueno	Approx 5,000 words	48pp	Age 8-10
-----------------------	--------------------	------	----------

Rights sold: Chinese

# What Animals Do

Discover the wackiest facts about animals and their poo, wee, snot and farts – and the scintillating science behind it!

The Snot that Animals Have Got  
The Farts that Animals Parp  
The Poo that Animals Do  
The Wee that Animals Pee
