The World Atlas of Wine 9th edition

A major new edition of this landmark wine book that has sold close to 5 million copies worldwide.

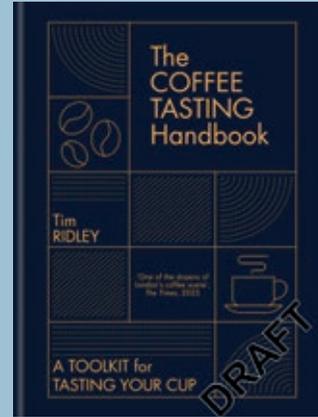

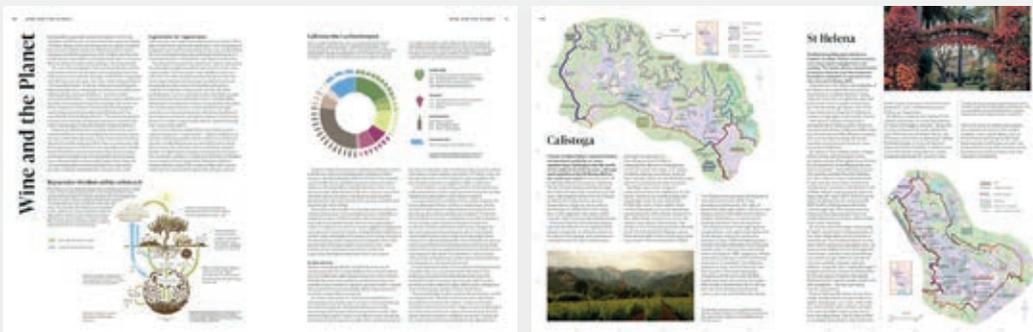

Few wine books can be called classic, but the first edition of The World Atlas of Wine made publishing history when it appeared in 1971 and subsequent editions have ensured it remains the most authoritative, must-have wine reference work available. This ninth edition will bring readers, both old and new, up to date with the fascinating and rewarding world of wine.

To reflect all the changes in the global wine scene since the last edition in 2019, 18 brand-new maps have been added to the wealth of superb cartography in the book. The incisive text has been given a complete overhaul to address the topics of most vital interest to today's wine-growers and drinkers including the impact of climate change resulting in new wine-growing in the far north of Europe and the sustainability initiatives being explored globally.

With beautiful photography throughout, Hugh Johnson and Jancis Robinson, the world's most respected wine-writing duo, working with esteemed maps editor Julia Harding, have once again joined forces to create a classic that no wine lover can afford to be without.

"The World Atlas of Wine is the single most important reference book on the shelf of any wine student." - Eric Asimov, New York Times

"The most useful single volume on wine ever published... If I owned only one wine book, it would be this one." - Andrew Jefford, Decanter

**The World Atlas of Coffee
3rd edition**

An in-depth guide to the dynamic world of coffee production by the Sunday Times bestselling author of *How to Make the Best Coffee at Home*, James Hoffmann.

For everyone who wants to understand more about coffee and its wonderful nuances and possibilities, this is the book to have. This expanded and fully updated 3rd edition contains new chapters on decaffeination and steep and release brewers, as well as additional origins of note such as Australia, Japan and Puerto Rico.

Coffee has never been better, or more interesting, than it is today. Coffee producers have access to more varieties and techniques than ever before and we, as consumers, can share in that expertise to make sure the coffee we drink is the best we can find. Where coffee comes from, how it was harvested, the roasting process and the water used to make the brew are just a few of the factors that influence the taste of what we drink. Champion barista and coffee expert James Hoffmann examines these key factors, looking at varieties of coffee, the influence of terroir, how it is harvested and processed, the roasting methods used, through to the way in which the beans are brewed.

Country by country, James identifies key characteristics and the methods that determine the quality of that country's output. Along the way we learn about everything from the development of the espresso machine, to why strength guides on supermarket coffee are really not good news. This is the first book to chart the coffee production of over 35 countries, encompassing knowledge never previously published outside the coffee industry.

**The Book of Coffee
A Philosophy**

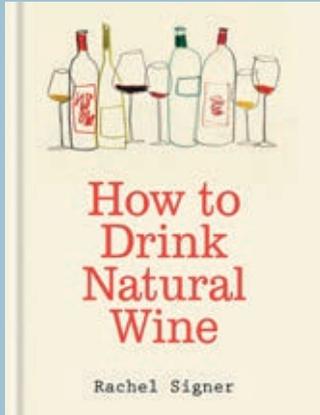

Philosopher Julian Baggini and coffee expert James Hoffmann team up in this beguiling deep dive into what the world's favourite hot drink can teach us about the art of living.

Julian Baggini has long been fascinated by the philosophical underpinnings of how we eat and drink, and the chance discovery in Tokyo of a copy of *The Book of Tea* by Kakuza Okakura (published in 1906) led him on a journey to explore our relationship with coffee. Coffee is the ritual that begins and gets us through the day, it not only fuels us but has shaped the very fabric of modern life. Our cup of coffee allows for a moment of deeper connection, both with oneself and others, through attentive preparation and consumption. A moment to embrace life's absurdity with joy and alertness.

This little book on coffee is something ultimately enriching and life affirming, an elevation of the everyday and a pleasure to read - a treatise on how we can infuse the seemingly mundane with moments of mindful attention and meaning. It will appeal not only to coffee lovers but to anyone intrigued by the intersections of culture, philosophy, and everyday life. In tracing the deep roots of coffee in our imagination, *The Book of Coffee* reveals why this humble drink remains a profound and lasting symbol of life itself.

'What is so appealing about the ideas in this book is that we could pivot coffee from being the driving force behind excessive hours and a poor work-life balance into being a drink that lets us contemplate meaning and purpose in a different way.'
- James Hoffmann, author of the Sunday Times bestseller *How to Make the Best Coffee at Home*

A Country Style

living and creating with nature through the seasons

A debut lifestyle book from the photographer and writer behind Instagram's @yomargey that celebrates the seasons in kitchen, garden and living spaces.

From creating a small cut-flower patch, to creating a festive decorative wreath, Harriet Thistlethwayte's A Country Style is an unhurried guide to making the most of the seasons, indoor and out.

In SPRING create a small cut-flower patch, display bulbs indoors or make a rhubarb cake. SUMMER offers simple instructions on how to make a hand-tied bouquet for a friend or inspiration for setting a seasonal dining table. In AUTUMN Harriet shares simple upholstery projects, urges you to grow dahlias and offers her spiced focaccia recipe, while WINTER brings ideas for creating structure in the garden at the quietest time of year and explains how to make a deliciously zesty marmalade cake.

Atmosfloric

Flower colour in home and garden

The hotly anticipated second book from designer Sean Pritchard, author of *Outside In*, exploring the impact of colour in the garden and how it can be displayed indoors.

The garden allows us to play with colour. Unlike the colours in our interiors, colour in the garden is fleeting and fickle, and with that comes an exciting opportunity to experiment with a changing performance of colour month after month and to bring those colours indoors for constantly changing displays.

Colours are considered in three mood-based chapters: Romantic, Energetic and Reflective. For each chapter Sean reveals his favourite flowers to grow (with plant lists and inspirational planting plans) and shows them in a range of inspirational gardens and interiors.

As with *Outside In*, the photography is by the author, who has photographed some highly sought-after gardens and interiors in England and France including the iconic Charleston Farmhouse and Kettle's Yard, plus the homes of Richard E Grant, Sam McKnight, Marin Montagut, Butter Wakefield, Isabel and Julian Bannerman and Anthony Watson of Atelier Vime.

Sean also takes a personal look at colour theory and explores the relationship that gardeners and gardener-artists have had with colour through history.

'Atmosfloric is an absolute feast! Not only totally beguiling and full of practical insights but it opens the doors on some of England and France's most beautiful places.' - Sophie Conran

The Nurturing Home

Decorating with Kotoisa, the Finnish Way to Happiness

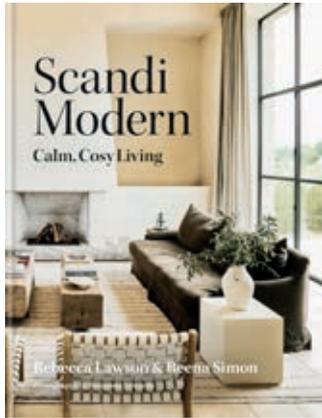

The book Susanna Laiho Hawkins' 1.1 million followers have been waiting for - a guide to the transformative power of the Finnish concept of 'kotoisa' and how to apply it to every room in your home.

In her first book, **The Nurturing Home**, Finnish-born Susanna Laiho Hawkins shows how taking inspiration from the concept of 'Kotoisa' can transform both your home, your happiness levels and the way you live your life, one small step at a time.

The book encourages you to embrace imperfection, declutter and rearrange, make the most of the light and flow of your home and bring nature and the seasons indoors. Susanna then explores a kotoisa approach to every room in the house to create a truly welcoming and nurturing home.

'Technically speaking, kotoisa translates to something like "cosy" or "homely", but as anyone who's lived it knows, that barely scratches the surface. Kotoisa isn't about plush throws and designer lights, although it can include those. It's about emotional warmth - the kind that seeps in quietly, unnoticed at first, but deeply comforting...Kotoisa is also a quiet rebellion against the constant pursuit of newness and perfection. In a world that tells us to upgrade and reinvent - kotoisa reminds us to notice what's already here. To work with what we have. To find joy in the old wooden spoon, the blanket with the worn edges, the chair that squeaks a little when you lean back but always catches you just right.'
- Susanna Laiho Hawkins

Thoughtful, accessible and rooted in real living, Scandi Modern offers a fresh perspective on calm, cosy living.

***'This book is a glorious love letter to comfort and calm - Scandi style.'* - Michelle Ogundehin, writer, author and TV presenter**

'Scandi Modern blends dreamy, light-filled homes with genuinely practical advice on how to bring that effortless calm and cocooning Scandinavian feel into your own space. I love how Rebecca and Reena balance interiors escapism with realistic, achievable styling foundations, from materials that age beautifully to rituals that make a house feel lived-in, not styled-for-show. It's thoughtful, grounding and full of ideas I couldn't wait to try at home' - Will Taylor @brightbazaar and The Drew Barrymore Show

How to Look, Draw & Paint

Explore the building blocks of drawing and painting and engage with the visual world around you, with the first practical art book from renowned artist, author and designer, Matthew Rice.

Learning to draw needn't be complicated or expensive, nor does one need a particularly spectacular subject to draw. Artist Matthew Rice encourages readers to look at and draw the scenes around them - the desk they are sitting at, the view out the window, a bowl of produce from the supermarket. And it is by truly sitting with and engaging with our everyday world that drawing skills can be learnt and strengthened, confidence built, and a new mindful creative activity developed.

A bunch of spring onions can be a starting point when thinking about shading and form. The view from your kitchen window becomes an exercise in perspective and measuring lines. A vase full of flowers is the perfect subject to develop your skills in detailed drawing and three-dimensional structure.

Little by little, by following the ten step-by-step exercises in the book, readers will build the skills and techniques to approach drawing any scene with confidence and ease.

“To know how to draw, you need to think about how to look, because to draw is to look and report in on what you have seen. As we learn to draw better we also learn to understand better: to analyze, explore and comprehend our world and its inhabitants. The exercise is more than an expression of a desire to decorate, to kill time or amuse. It is in fact a vital and near universal mode of communication that allows us to speak to those with whom we share no other common language.” - Matthew Rice

Oubaitori
The Japanese Art of Self-Acceptance

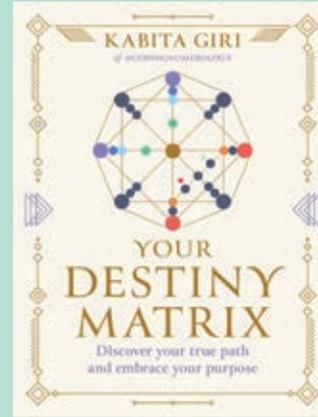

Learn how to live a life free of comparison and embrace your own unique journey guided by oubaitori, the Japanese concept inspired by the flourishing beauty of cherry, plum, peach and apricot blossoms.

Rooted in Japanese philosophy and the rhythms of the natural world, this book offers a gentle invitation to honour your individuality and embrace the pace of your own growth. Through seasonal rituals, mindful meditations and nature-based exercises, this beautifully illustrated guide helps you move beyond comparison and into a deeper sense of self-worth.

Whether you're seeking confidence, renewal or just a moment of stillness, this book is a calming companion to guide you back to yourself - one season, and one blossom, at a time.

Stop comparing and start blossoming.

Just a Shot Away
Spanish Tony's Historic Photographs of the Rolling Stones

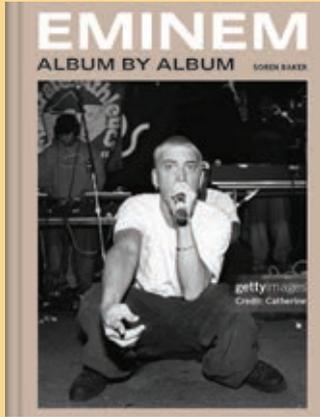

This is The Stones as you've never seen them before. These are the unguarded, behind-the-scenes, candid photos of the group, taken between 1969 and 1973 when they were at the peak of their creative powers, at the vanguard of youth culture.

Taken by Keith's 'assistant', Spanish Tony, these never-seen-before images show the Rolling Stones relaxing in French villas; chilling at Keith's country pile; playing in concerts and TV specials and giving an intimate insight to life on the road.

From 1969 to 1973, Tony Sanchez was part of the band's inner circle. He was their unofficial photographer during a fertile and eventful creative period that saw the release of the likes of Beggar's Banquet, Sticky Fingers and Exile on Main Street. He captured the band members during moments of rest and play... and there was a lot of both.

This is the first collection of an incredible archive that unveils a previously unseen history and offers an intimate portrait that every Stones fan will adore. With over 200 images and context provided by respected music journalist and Stones expert Simon Goddard, Just a Shot Away is an illustrated music book like no other.

Have you ever wondered why, despite their adorable exterior, rabbits haven't taken over the world? Are you struggling to land a date? Or bend a free kick like Beckham?

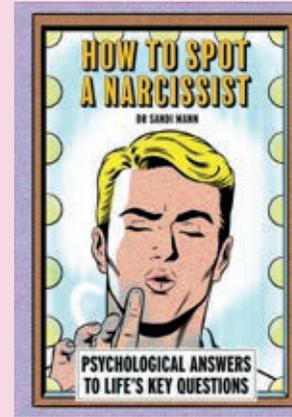

These questions - though frustrating and sometimes absurd - are more than just matters of bad luck. They're puzzles that mathematics can help solve.

In Why Don't Rabbits Rule the World?, mathematicians Ben Sparks and Dr. Katie Steckles reveal how numbers make sense of life's most head-scratching questions. From spotting lies to winning (or wisely losing) bets, from splitting the bill without arguments to predicting the quirks of nature itself, this book shows how maths can tackle problems you didn't even know you had.

With wit, clarity, and plenty of puzzles and paradoxes to keep you thinking, discover the hidden role numbers play in our everyday lives.

Is My Coffee Conscious?

Philosophical Answers to Life's Key Questions

In this witty and mind-bending book, philosopher Gareth Southwell uncovers the weird world of philosophy woven into the fabric of everyday life.

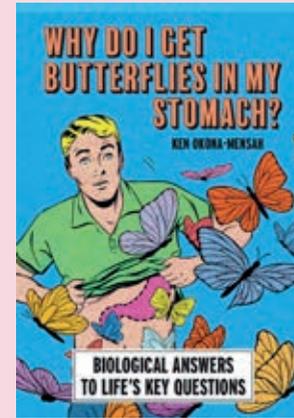

Were you Napoleon in a past life? Is your coffee conscious? And do you really have free will - or are you just a pre-programmed brain in a jar?

In this witty and mind-bending book, philosopher Gareth Southwell uncovers the weird world of philosophy woven into the fabric of everyday life. From the mysteries of the mind (are your memories really yours?), to living the good life (can I do wrong to do right?), and a host of other conundrums, *Is My Coffee Conscious?* explores life's biggest questions in the most unexpected of places.

Packed with brain-boggling thought experiments, real-world dilemmas and a host of 'wait...what?' moments, the book proves that philosophy isn't just for ancient scholars - it's for anyone who's ever doubted if we really landed on the Moon, fallen in love with their best friend, or wondered if their laptop is secretly judging their search history...

Why Do I Get Butterflies in my Stomach?

Biological Answers to Life's Key Questions

Through everyday questions, expert science writer Ken Okona-Mensah reveals how your choices, emotions, and behaviours are shaped - often without your awareness - by complex biological systems.

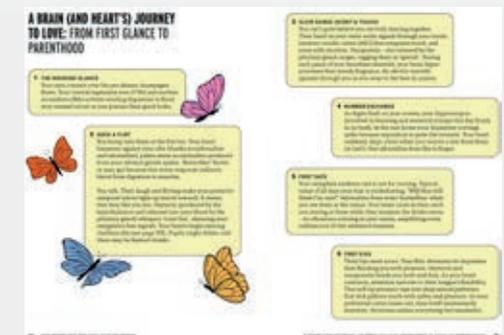

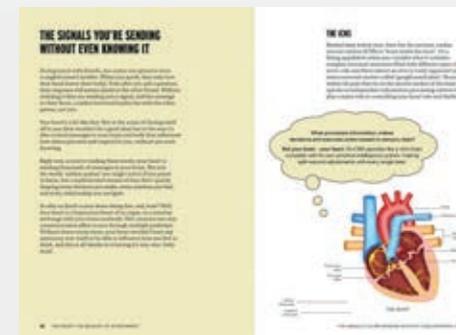

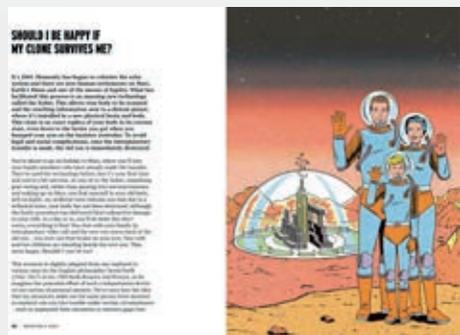

What's the best way to study (according to neuroscience)? Can you trust your gut instincts? What is love - and is it all in your head?

In this eye-opening exploration of the body's hidden intelligence, expert science writer Ken Okona-Mensah reveals how your everyday choices, emotions, and behaviours are shaped - often without your awareness - by complex biological systems. From the microbes in your gut, to the rhythms of your heart, *Why Do I Get Butterflies In My Stomach?* uncovers the unconscious biology driving everything from trust and attraction to disease, stress, and decision-making.

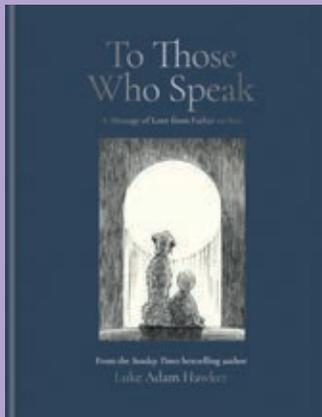

Packed with strange-but-true facts, evolutionary oddities, and plenty of 'ohhh, so that's why' moments, this book reveals that biology isn't just something you learned in school - it's the hidden force behind why the countryside heals, who you love, the friends you choose, and so much more.

A Message of Love from Father to Son

A moving tale of a boy and his dog, and a friendship beyond words, from the bestselling author of *Together* and *The Last Tree*.

This is a book about an unconventional parenting journey, and the joy that is unlocked when we really learn to listen.

A heartening, hopeful story of fatherhood and friendship, from bestselling author and artist Luke Adam Hawker.

Prayers: A card deck

50 cards to open your heart

50 illustrated prayer and blessing cards for health, happiness and hope.

Many of us pray during times of hardship, but not always to a religion or a god. We pray that our friends are safe, we pray that our Earth will heal, we pray for help. We're asking our inner selves, a higher being, the cosmic or the divine to guide us and keep us safe.

Sometimes we just need an affirmation to help ourselves through a bad day and sometimes we need guidance to find the right words to manifest good fortune for ourselves and the world around us. Putting our feelings and desires into words is a key part of many spiritual practices because it helps us centre ourselves and set our intentions. Prayers, affirmations and blessings help us express positive emotions, hold space for challenging ones and call out to the universe for the intangible things we're seeking, such as love, grace and hope.

Our spiritual lives might all look a bit different but we don't need to invoke any specific faith to share words of kindness because wishing each other well with open hearts is something we all have in common.
